

VERMONT SLEEP SOUNDS & MUSIC BRINGS RELAXING SURROUND SOUNDSCAPES TO APPLE TV

Burlington, VT — May, 2021 — Jeff Perrin Music, LLC this month released an update which brings the immersive audio of Vermont Sleep Sounds & Music to tvOS and the Apple TV. Vermont Sleep Sounds & Music features original recordings of music, nature and white noise sounds, meticulously hand-crafted for quality and produced to take advantage of home theater equipment such as surround speakers, sound bars, and even Apple HomePods. The app is the first of its kind to include support for Dolby Digital surround sound audio, allowing users to effectively transform their living room or home theater space into the ultimate relaxation getaway.

About the App

Beyond its innovative support for Dolby surround sound audio, Vermont Sleep Sounds & Music is also unique in that many of the sounds offer variable options which allow users to customize their own sleep soundscape. For example, fans sounds all have various speed settings and the rain sounds are offered as with or without thunder. A mixer page allows users to blend sounds and set custom audio levels, and the sleep timer features a slow, gentle fade.

Vermont Sleep Sound & Music Feature List

- Configurable sounds let users adjust fan speeds, select wind intensity, or even toggle thunder on or off for rain sounds.
- Dolby Digital support enhances speaker or headphone experience to help users escape their surroundings.
- Music tracks feature a mix of tranquil piano and classical guitar melodies. Perfect for meditation or drifting off to sleep.
- Mixer function allows users to blend sounds and set custom audio levels.
- Users can save their custom soundscapes to create playlists for any occasion.

- Subscription-free business model. A single in-app purchase unlocks all current and future sounds.
